Each of the solutions given by the quadratic formula is called a root of the quadratic equation. Geometrically, these roots represent the x values at which any ...Mathematica » The #1 tool for creating Demonstrations and anything technical. Wolfram|Alpha » Explore anything with the first computational knowledge engine. The quadratic formula helps us solve any quadratic equation. First, we bring the equation to the form $ax^2+bx+c=0$, where a, b, and c are coefficients. Then, we plug ...In the quadratic formula, the expression underneath the square root sign is called the discriminant of the quadratic equation, and is often represented using an upper ...
